✓ Responsibilities

- Developed the React Native app's frontend, integrated it with the backend, and made required backend adjustments for the current app needs.
- Implemented a full order flow, including payment gateway integration with Razorpay, PhonePe, and Paytm.
- Implemented real-time push notifications and analytics using Firebase, and added real-time chat via Socket.io
- Implemented smooth animations and responsive UI design using libraries like Framer Motion, Tailwind, React Native Reanimated, etc.
- Successfully published the app on Google Play Store and Apple App Store, making necessary fixes when the app faced rejection.

⭐ Hyposoft Global Solutions
Feb 2022 - Present

- Digi Sports: An app for organizing sporting events, featuring a social section, team groups, match updates, and more.
- Render9: A comprehensive app for shop sellers and brokers to list, buy, sell, send quotations, manage expenses, and approve transactions.
- Cold Konnect: An app for users to find and rent cold storage space, and another app for hosting or listing available cold storage options for clients.

⭐ FarmOR Agri Solutions
Nov 2021 - Jan 2022

- FarmOR Partner: A B2B customer-focused app for agricultural product purchases.
- FarmOR Website: Landing page showcasing company services with seamless animations.
